The Permit and License to Operate a Drone in Indonesia Based on its Additional Equipment :

No.	Additional Equipment	Provision	Permit
1	Camera	a.The drone is not allowed to operate at a distance of less than 500m from the outer boundary of a prohibited area or restricted area. b.For purposes of photography, film, or mapping,the drone operator has to enclose the permit letter from the authorized institution based on the applied regulation.	The permit application for operating the camera and the operator certificate should be addressed to the Directorate of Airworthiness in the Ministry of Transport.
2	Farming equipment (pests control and/ or sowing seed)	a.The drone is only allowed to be operated in the farming or plantation area described in the filing of flight plans. b.The drone is allowed to be operated if there's no settlement area within 500m of the outer limits of the farming/plantation area.	With regard to the drone operational areas, the permit application should be submitted to the Directorate of Air Navigation in the Ministry of Transport. For other uses, it depends on the local regulations of each area where drone is operated.
